

SECTION 211 ROAD OBLITERATION

211.01 **DESCRIPTION** - Delete the text of this subsection and substitute the following:

This work consists of obliterating and re-contouring roadways and other paved areas.

211.02 **CONSTRUCTION REQUIREMENTS** - Amend the paragraph of this subsection to read as follows:

Scarify and remove existing pavement structure where required. Break down and remove old structures. Fill ditches and restore the obliterated roadway to the approximate original ground contour or shape to blend with the terrain, or construct to improve the area per plans.

(a) Rigid Material

(1) Non-Asphalt Material

Break concrete pavements and other non-asphalt rigid materials into pieces of dimensions acceptable to be received by the Tinian Dump Site. Burying of materials within the project site and or limits will not be permitted. See Subsection 203.05 for disposal requirements.

(2) Asphalt Material

Strip and remove the existing asphalt (bituminous) pavement and disposed of material per subsection 203.05.

211.05 **MEASUREMENT** – Delete and revise the paragraph to read as follows:

Roadway obliteration will not be measured separately for payment.

211.06 **PAYMENT** – Delete and revise the paragraph to read as follows:

The work covered by this section will not be measured and paid for separately, but will be considered as subsidiary obligation of the Contractor under pay items shown in the bid schedule.

END OF SECTION 211
